

Module Details	
Module Title	Beginning Midwifery Knowledge 1: Fundamental of Midwifery Practice
Module Code	MID7501-B
Academic Year	2024/5
Credits	20
School	School of Allied Health Professions and Midwifery
FHEQ Level	FHEQ Level 7

Contact Hours	
Type	Hours
Lectures	20
Practical Classes or Workshops	8
Directed Study	10
Independent Study	150
Seminars	12

Availability	
Occurrence	Location / Period
BDA	University of Bradford / Semester 1

Module Aims
The aim of this module is to introduce you to the role of the midwife in public health and the provision of universal care for women. The module will support your exploration of the role of the midwife in optimising normal physiological processes.

Outline Syllabus
Organisation midwifery and maternity care, health and social care systems, NMC Code and Standards, NHS values, definition and role of the midwife. Key national drivers. Anatomy and physiological processes related to adolescence, reproduction, embryology, pregnancy, labour, postpartum, neonatal adaptation. Clinical skills: TPR, blood pressure, abdominal palpitation, initial exam newborn. Birth models of care, principles of salutogenesis, infection control, epigenetics, genomics, genetics, sexual health, contraception, health care screening, pharmacology, medicines legislation and management.

Learning Outcomes	
Outcome Number	Description
1	Critically apply professional and legal frameworks to contemporary midwifery practice.
2	Critically explore and evaluate midwifery practice based on knowledge of the fundamental physiological processes across the childbearing continuum.
3	Demonstrate critical insight of the role of the midwife in assessment, screening, and care planning.

Learning, Teaching and Assessment Strategy
<p>Teaching and learning will be supported by a blended approach that utilizes synchronous and asynchronous lectures and seminars to explore and develop theoretical knowledge, critical thinking and shared professional knowledge (LOs 1, 2, 3). Problem based learning will support exploration and application of knowledge to the professional context. Case studies, seminars and workshops will support the application of theory to practice and shared learning (LOs 2, 3). Simulation will be utilised to support application of theory to practice and clinical skills development. Assessment support will be available from your personal academic tutor (PAT) as well as formative opportunity to assess knowledge through MCQ and short answer exam. Directed learning will support consolidation of key concepts and theory, including anatomy and physiology.</p> <p>The assessments will enable you to demonstrate knowledge and understanding of the subject areas and its application to midwifery practice. The multiple-choice questions (MCQ) and short answer exam will assess knowledge of maternal and fetal anatomy and physiology to support antepartum, intrapartum and postpartum care, the principles of salutogenesis and the role of the midwife (LOs 1, 2, 3).</p>

Mode of Assessment			
Type	Method	Description	Weighting
Summative	Online MCQ Examination	MCQ and short answers questions	100%
Formative	Computer-based assessment	MCQ and short answer questions (45 minutes)	N/A
Formative	Not assessed	PAT support and feedback on formative work in preparation for summative submission.	N/A

Please note:

This module descriptor has been published in advance of the academic year to which it applies. Every effort has been made to ensure that the information is accurate at the time of publication, but minor changes may occur given the interval between publishing and commencement of teaching. Upon commencement of the module, students will receive a handbook with further detail about the module and any changes will be discussed and/or communicated at this point.
